

SHANTANU VANARASE

DevOps Engineer

Email: shantanuvanarase@outlook.com

Mo. No.: +91 7758001394

Linkedin: [linkedin.com/in/shantanu-vanarase-aa6b17238](https://www.linkedin.com/in/shantanu-vanarase-aa6b17238)

Objective:

AWS Certified DevOps Engineer with **2+ years of experience** in cloud infrastructure management, automation and CI/CD pipeline optimization. Proficient in leveraging AWS services, **GitHub** for Source Code Management, Infrastructure as Code with **Terraform**, Containerization tools such as **Docker**, Orchestration tool like **Kubernetes**, Monitoring part With **Prometheus** and **Grafana** and Experienced with CI/CD tools like **Jenkins**, **GitLab CI** and **AWS CodePipeline** to streamline workflows and improve scalability, reliability and operational efficiency. Seeking to apply my expertise in a challenging DevOps role to drive innovation and optimize cloud-based processes.

Professional Experience:

Spontact Global Pvt Ltd
Bengaluru, Karnataka, India.

Nov 2022 – Present

Roles and Responsibilities:

- Integrated **Jenkins Pipeline** with version control systems, artifact repositories and deployment tools. Monitored jobs and optimized build performance. Automated build, test and deployment processes using declarative or scripted pipelines in **Jenkinsfile**.
- Built, managed and optimized **Docker** containers for development, testing and production environments. For Docker container written multiple **Dockerfile**.
- Orchestrated containerized applications using **Kubernetes**. Ensured container security and compliance with best practices. Deployed, managed and scaled containerized applications in Kubernetes clusters in **EKS** service of AWS. Configured and managed **K8s** resources such as pods, deployments, services and ingresses for **microservices**.
- For monitoring, logging and alerting solutions for K8s Clusters used **Prometheus** and **Grafana** and also familiar with Bugs tracking tool **Jira** is also used for tracking our Project.
- Wrote several **Ansible Playbooks** for infrastructure automation, configuration management, application deployment, system update, network automation, etc.
- Authored many **Terraform** file for built infrastructure on Cloud with multiple block like Module, Data, Resources, Terraform, Provider, etc.
- Administered version control systems and repositories. Collaborated with development teams to ensure proper branching, merging and code reviews. Executed branching strategies using **Git** or **GitHub**.
- Managed project dependencies and build configurations using **Apache Maven** and **Docker**, integrating them into CI/CD pipelines for automated builds and releases.
- Set up and configured **SonarQube** for code quality analysis and static code analysis. Integrated SonarQube with CI/CD pipelines to automate code quality checks. Analyzed code quality metrics, identified code smells, bugs and vulnerabilities.
- Administered **IAM** policies and roles for over 15 users, created and managed IAM users, groups and roles to control access to AWS services efficiently.
- Configured **EC2** instances for hosting applications and services. Configured instance types, sizes and AMIs based on application requirements.
- For objects type of storage stored on **S3 Bucket**. Familiar with **MySQL**, **PostgreSQL**, **MariaDB** and **MangoDB** which provided by AWS **RDS** service and Testing of Database.

- Configured **VPC** peering and transit gateways for network connectivity between VPCs. Provisioned and attached EBS volumes to EC2 instances for persistent block storage. Configured **EBS** snapshots for 100% backup and disaster recovery.
- Managed domain names and DNS records using **Route 53**. Set up **DNS** routing policies such as geo location routing, failover routing, simple routing, weighted, etc. to manage the uncertain traffics. For security of web site integrated **SLL** Certification with **ACM**.
- Resolved server issues with **Linux** OS, including Networking, Volume Partitions and more for over 25 servers, ensuring high availability and minimizing downtime throughout the **SDLC & STLC**.
- Experienced in Software Package Management with **yum** and **apt-get**, Managed Roles and Permissions of Users and Groups to give secured access.
- For Security purpose, Configured Security Groups (**Firewalls**), Network Access Control List (**NACL**) and applied **SELinux** policies to secure hosted servers. And also management VMware.
- **API Server** Management with troubleshooting of server issues. Familiar with Multiple Protocols HTTP, HTTPS, TCP, DHCP, NFS, FTP, SSH, etc. It helps to communicate over Internets.

Skills:

- ✓ **Version Control:** Git, GitHub and GitLab
- ✓ **Containerization Tools:** Docker
- ✓ **Container Orchestration:** Kubernetes
- ✓ **Infrastructure as Code (IaC):** Terraform and CloudFormation
- ✓ **Configuration Management:** Ansible
- ✓ **Database Management:** MySQL, PostgreSQL, MariaDB and MongoDB
- ✓ **CI/CD Pipelines:** Jenkins CI/CD
- ✓ **Monitoring Tools:** Prometheus, Grafana and AWS CloudWatch
- ✓ **Cloud Platforms:** AWS (IAM, EC2, S3, RDS, Route 53, VPC, EFS, EKS, CloudFront), Basics of Azure and GCP
- ✓ **Linux Administration:** Ubuntu, CentOS and RHEL (System Configuration, Network Management, Shell Scripting) and VMware.
- ✓ **Network Management:** CCNA Tools
- ✓ **Web Servers:** Nginx, Apache, API Server and HTTPD
- ✓ **Scripting Languages:** HCL, YAML, Go, Groovy, Python, Bash and Shell scripts.

Personal Details:

Education: Bachelor of Commerce from Pune University in 2023,

Date of Birth: 21 July 2003

Marriage Status: Unmarried

Languages: English, Hindi & Marathi

Hobbies: Open-Source Contributions, Learning New Technologies, Playing Chess.
