

SHANTANU VANARASE

Sr. DevOps Engineer

Email: vanaraseshantanu@outlook.com

Mo. No.: +91 7758001394

LinkedIn: [linkedin.com/in/shantanu-vanarase-aa6b17238](https://www.linkedin.com/in/shantanu-vanarase-aa6b17238)

Objective:

AWS Certified Solution Architect and DevOps Engineer with 3.5+ years of experience in cloud infrastructure management, automation and CI/CD pipeline optimization. Skilled in AWS services, **GitHub** for SCM, **Terraform** for Infrastructure as Code, **Docker** for containerization, **Kubernetes** for orchestration, **Zabbix**, **Prometheus** and **Grafana** for monitoring and CI/CD tools like **Jenkins**, **GitLab CI** and **AWS Code Pipeline**. Adept at streamlining workflows to enhance scalability, reliability and efficiency. Seeking a challenging DevOps role to drive innovation and optimize cloud-based processes.

Professional Experience:

Zenplus Pvt Ltd Jan 2025 – Present
Mumbai, Maharashtra, India. (**Remote**)

Web Crypt Technology (**Remote**) Nov 2022 – Jan 2025
Pune, Maharashtra, India.

Projects:

1. State Government EDS Project (UP, Bihar, Punjab & Pvt Business)

- Microservices-based government EDS platform deployed on on-prem infrastructure.
- Automated **CI/CD using Jenkins, Docker** and Nginx with **SSL**.
- Implemented security hardening and supported multi-state production environments.
- Managed PostgreSQL HA, monitoring and system stability.
- Ensured high availability, compliance and production support.

2. Zenzo Project

- Healthcare emergency services platform with **Kubernetes (RKE)** container management tool.
- **Managed CI/CD**, API gateway (Kong), Nginx and PostgreSQL.
- Implemented **SSL**, security headers, monitoring and logging.
- Ensured high availability, compliance and production support.

3. Biometrics Project

- Secure biometric authentication system for identity verification.
- Deployed Docker-based services with strict security controls.

4. Ambulance Audit Project

- Implemented **SSL, CSP and HTTP** security headers.
- Resolved audit findings across UAT and production environments.

Roles and Responsibilities:

- Integrated **Jenkins Pipeline** with version control systems, artifact repositories and deployment tools. Monitored jobs and optimized build performance. Automated build, test and deployment processes using declarative or scripted pipelines in **Jenkinsfile**.
- Built, managed and optimized **Docker** containers for development, testing and production environments. For Docker container written multiple **Dockerfile**.
- Orchestrated containerized applications using **Kubernetes**. Ensured container security and compliance with best practices. Deployed, managed and scaled containerized applications in Kubernetes clusters in **EKS** service of AWS. Configured and managed **K8s** resources such as pods, deployments, services and ingresses for **microservices**.
- Designed, deployed and maintained **Helm charts** to simplify Kubernetes application management and streamline deployment processes.
- For monitoring, logging and alerting solutions for K8s Clusters used **Prometheus and Grafana** and also familiar with Bugs tracking tool **Jira** is also used for tracking our Project.
- Wrote several **Ansible Playbooks** for infrastructure automation, configuration management, application deployment, system update, network automation, etc.
- Authored many **Terraform** file for built infrastructure on Cloud with multiple blocks like Module, Data, Resources, Terraform, Provider, etc.
- Administered version control systems and repositories. Collaborated with development teams to ensure proper branching, merging and code reviews. Executed branching strategies using **Git or GitHub**.
- Managed project dependencies and build configurations using **Apache Maven and Docker**, integrating them into CI/CD pipelines for automated builds and releases.
- Set up and configured **SonarQube** for code quality analysis and static code analysis. Integrated SonarQube with CI/CD pipelines to automate code quality checks. Analyzed code quality metrics, identified code smells, bugs and vulnerabilities.
- Utilized AI-powered DevOps tools such as **ChatGPT, Amazon Q Developer, Claude and Google Gemini** for code generation, Shell scripting, YAML and Dockerfile creation, Kubernetes manifest validation, Terraform and Ansible automation, log analysis, root cause analysis (RCA) and infrastructure troubleshooting, improving deployment efficiency and reducing manual effort across CI/CD and cloud operations.
- Administered **IAM** policies and roles for over 15 users, creating and managing IAM users, groups and roles in AWS and **Azure AD** to control access to cloud services efficiently.
- Configured **EC2** instances and **Azure VM** for hosting applications and services. Configured instance types, sizes and AMIs based on application requirements.
- Utilized **S3 buckets** and **Azure Blob Storage** for object storage. Worked with databases such as MySQL, PostgreSQL, MariaDB and MongoDB, provided by **AWS RDS** and **Azure Database Services**, including database testing and optimization.
- Managed domain names and DNS records using **Route 53**. Set up **DNS** routing policies such as geo location routing, failover routing, simple routing, weighted, etc. to manage the uncertain traffics. For security of web site integrated **SLL** Certification with **ACM**.
- Resolved server issues with **Linux** OS, including Networking, Volume Partitions and more for over 25 servers, ensuring high availability and minimizing downtime throughout the **SDLC & STLC**.
- Experienced in Software Package Management with **yum** and **apt-get**, Managed Roles and Permissions of Users and Groups to give secured access.
- For Security purpose, Configured Security Groups (**Firewalls**), Network Access Control List (**NACL**) and applied **SE Linux** policies to secure hosted servers and management VMware.
- **API Server** Management with troubleshooting of server issues. Familiar with Multiple Protocols. It helps to communicate over Internets

Skills:

- ✓ **Version Control:** Git, GitHub and GitLab
- ✓ **Containerization Tools:** Docker
- ✓ **Container Orchestration:** Kubernetes and Docker-Swarm
- ✓ **Infrastructure as Code (IaC):** Terraform and CloudFormation
- ✓ **Configuration Management:** Ansible, Konga.
- ✓ **Database Management:** MySQL, PostgreSQL, MariaDB and MongoDB
- ✓ **CI/CD Pipelines:** Jenkins CI/CD
- ✓ **Monitoring Tools:** Prometheus, Grafana, Zabbix and AWS CloudWatch
- ✓ **AI Tools:** Cloude, ChatGPT, Gemini, n8n, **Amazon Q Developer.**
- ✓ **Cloud Platforms:** AWS, Basics of Microsoft Azure and GCP
- ✓ **Linux Administration:** Ubuntu, CentOS, RHEL and VMware.
- ✓ **Web Servers:** Nginx, Apache, API Server and HTTPD
- ✓ **Scripting Languages:** HCL, YAML, Go, Groovy, Python, Bash and Shell scripts

Certifications:

AWS Certified Solutions Architect – Associate

Date Earned: December 2024

Credential ID: a72ff52638f244fa864bd8f9f95cf588

Credential URL: <https://aws.amazon.com/verification/>

Personal Details:

Education: Bachelor of Commerce, Pune University, 2023.

Date of Birth: 21 July 2003

Languages: English, Hindi & Marathi
